

Dear Vision Center Manager and Associates,

### **NEW Velocity X Photochromic Lens**

We're excited to announce the next evolution of self-tinting lenses, replacing the current Velocity Photochromic lenses. Introducing **NEW Velocity X Photochromic Lenses** that adjust to any light condition and quickly go from clear indoors to sunglass-level dark outdoors.

Your patients will enjoy:

- Fast reacting self-tinting lenses that are clear indoors and sunglass dark outdoors
- Excellent vision in all light conditions
- Full UV 400 protection
- Availability in Plastic, Polycarbonate, and Hi-index 1.67

**NEW Velocity X Photochromic Lenses** deliver greater performance across the entire Rx range and address patients' blue light concerns.

Look for this new photochromic lens in BOSS beginning February 14, 2023.
